The Yellowstone River is the longest free-flowing (undammed) river in the contiguous United States. The longest river in the U.S. by miles, the Missouri River, begins in Montana at the "Three Forks" - the intersection of the Gallatin, Madison and Jefferson Rivers. Flathead Lake is the largest fresh water lake west of the Mississippi River.

During prohibition, when people continued to consume alcohol despite its banning, law officials got frustrated and decided to try a different kind of deterrent: death. They ordered the poisoning of industrial alcohols manufactured in the U.S., which were products regularly stolen by bootleggers. By the end of Prohibition in 1933, the federal poisoning program is estimated to have killed at least 10,000 people.

Montana's largest county by population is Yellowstone County, home to almost 159,000 people according to 2017 estimates. That's 35 percent more people than the next most-populated county (Missoula), and 300 percent more than the least-populated county (Petroleum). Approximately 1 in 7 Montanans live in Yellowstone County.

Alaska is the largest state in the United States, and was sold for a total of \$7.2 million, which amounts to about 2 cents per acre.

The state was purchased from Russia in 1867. In the 50 years that followed, America made their money back for the \$7.2 million more than 100 times over.

Abraham Lincoln is in the Wrestling Hall of Fame. Defeated only once in approximately 300 matches, Lincoln reportedly talked a little smack in the ring. According to Carl Sandburg’s biography of Lincoln, Honest Abe once challenged an entire crowd of onlookers after dispatching an opponent: “I’m the big buck of this lick. If any of you want to try it, come on and whet your horns.”
There were no takers.

The largest observed snowflake fell during a storm in 1887 in Montana. It was measured at 15 inches wide.

Never rail at the storms, the furious winds, the biting frosts and snows...

Bright days and dark days are both expressions of the great mystery.

~ Chief Luther Standing Bear Oglala Sioux

"Tufts-Love Rex," a giant
Tyrannosaurus skeleton, was
found in 2016 in Hell Creek,
Montana. It is one of only 15
virtually intact T. Rex skeletons
and one of the largest ever found.

Agriculture is the most healthful, most useful and most noble employment of man.
~ George Washington

Don’t judge each day by the harvest you reap but by the seeds that you plant.
~ Robert Louis Stevenson
